MOVEMENT SYSTEMS

dynamic

Movement is our business

Today's markets demand a high level of flexibility and dynamism in all areas of a company – from the innovation of new products to quality management and customer service.

As a leading company in quality flat belts, conveyor and processing belts Forbo Siegling has a huge advantage: movement is simply second nature to us.

There is no question about what our customers can expect: total commitment to continual development and improvement of all our services – we hit the ground running.

1919

Founding of company by Ernst Siegling in Hannover, Germany. Production of chrome-leather vertical drive belts and other innovative power transmission elements.

1943

Invention of multi-ply flat belt consisting of nylon and chrome leather, patented under the trade name Extremultus.

1955

Start of production in a new plant, also located in Hannover.

1956–1989

Founding of Siegling companies in the United States, Switzerland, Mexico, Japan, Italy, France, Sweden, the Netherlands, Denmark, Australia, Austria and Spain.

1961

Launching of a conveyor belt concept for light materials handling under the trade name Transilon offering a range of types to meet any and every market demand.

1975

Start of production in the Fukuroi plant in Japan.

Forbo Siegling guarantees consistent market orientation, top product quality and comprehensive service and support. And, of course, the certainty that Forbo Siegling's products, applications and services comply with the requirements of tomorrow's world.

But even top quality products and commitment cannot replace personal contact to the customer. This is why we have more than 2,000 employees in over 50 countries globally. There are more than 300 service points in places all over the world.

1993

Start of production in the USA at Carolina Manufacturing Center (CMC), Huntersville, North Carolina.

1995

Manufacture of plastic modular belts launched under the Prolink brand name.

1994

On January 1, take-over of shareholder interests by the Swiss group Forbo International SA.

1997

Founding of Forbo Siegling (Shenyang) Belting Ltd. in China.

1999

Commissioning of the new calender in Hannover at 4.5 m production width.

2007

New globally-driven corporate and management structure. Further integration of the Forbo Group's business units. Siegling Belting becomes Forbo Movement Systems.

since 2001

Further expansion of the distribution and service network including eastern Europe.

pervasive

You'd be amazed
at what we put in motion

All the pasta ingredients are ready.
The dough is transferred by Siegling Transilon conveyor
belts, the pasta dried and packaged for transport ...
Enjoy your meal!

Orders on the spur of the moment.
Siegling Extremultus flat belts sorted your order in the
letter-sorting centre. Now it will be put together on our
conveyor belts and sorted by the parcel service for deli-
very ... Have fun unpacking!

Now the car's ready for its first drive. Our powerful flat
belts convey countless components to the presses. Our
conveyor belts collect them and even provide the mobi-
le floor for efficient final assembly ... Enjoy your trip!

Not always visible, but practically everywhere Forbo Siegling's products ensure that your daily life runs smoothly. For example so that you can look forward to fresh bread on the table for breakfast and the daily paper hot from the press.

In manufacturing, trade and service industries our power transmission and conveyor belts are often even indispensable components of the whole system – in distribution and logistic centres, in baggage handling at the airport, at the check-out in the supermarket.

The next time you're sweating on a treadmill in the gym – the chances are that it's Forbo Siegling that's keeping you in shape.

Today's paper. Our conveyor belts transport the rolls of paper and carry away the printed newspapers. Siegling Extremultus flat belts guide the paper at high speed whilst folding ... Hopefully it's only good news.

Your new house is ready at last. Siegling Transilon pre-press and ventilation belts help manufacture particle boards for energy-saving walls. Our Extremultus flat belts for robust power transmission in the sawmill ... Time to start the house-warming party.

After a hard day's work, something completely different. Siegling Transilon conveyor belts get you into shape in the gym ... You can start to relax.

innovative

Ever-increasing competitive pressure and globalisation of the markets require innovative concepts in production, material flow and logistics. Power transmission belts, conveyor and processing belts often play a central role in that.

This is why leading companies all over the world can count on Forbo Siegling as a competent partner in developing specialised and advanced solutions for power transmission, conveying and production.

The result: comprehensive product ranges for different challenges from the most varied of industries. And at the same time the guarantee of longer service lives and economical operation.

Our products: as individual as our customers

Siegling Transilon conveyor and processing belts for speeding the flow of goods and for economical processing in the light materials handling industry.

With over 120 types and designs the Siegling Transilon range offers the required variety for the most diverse conveying tasks in all areas and at the same time – seemingly as a matter of course – undertakes additional processing tasks too.

Siegling Extremultus flat belts are optimised for numerous operations and have proved themselves in nearly all areas of manufacture.

As power transmission belts they are responsible for smooth transmission of power. High-efficiency tangential belts and spindle tapes get the best out of machines in the textile industry. Folder and carrier belts as well as layboy tapes safeguard the precision of machine operations in letter-sorting systems and in the paper, printing and packaging industries.

Siegling Prolink modular belts are a useful supplement to conventional conveyor belts in many applications, often in food manufacture. They are easy-clean, durable and food safe.

In modern power transmission and handling technology Siegling Proposition timing belts are very versatile machine components operating economically, accurately and reliably.

quality-orie

Committed to the future

Our aim is to help make today's world better and more comfortable with high-quality products and solutions.

For that reason we place very high demands not only on the quality of our products but also on the continuous improvement of environmental protection performance – both in technical and administrative areas. Forbo Siegling is often the forerunner in introducing production processes that save resources and are low on emissions and state-of-the-art environmental and disposal technology.

As a result our research and development is not just a reaction to our customers' needs but an integral part of our own concepts and visions.

So we complement our product range with full support and training services by experts in the field and customer service globally.

How will tomorrow's customers want to manufacture?
What production and logistics issues will be important as a result?
What functions can our products take on? Where can they make new processes possible?

Our specialists in the field tackle these issues by talking in depth to our customers.

nted

Our customers can rely on consistently high quality from Forbo Siegling for a good reason. If progress is to be made, the standard of quality must be constantly maintained. Forbo Siegling does this in every production centre and for each individual product.

The Forbo Siegling Quality and Environmental Management Systems are certified in accordance with DIN EN ISO 9001 and ISO 14001.

All the Forbo Siegling organisation operates according to the Total Quality Management Principles.

TQM

Practical supplements to our comprehensive product range: sound know-how transfer with our support, training and documentation, as well as our wide range of tools and equipment.

Manufacturing, trade and service companies worldwide put their trust in our products and benefit from our extensive international service and distribution network with more than 300 service points.

Forbo Siegling has companies and agencies in over 50 different countries all over the world – so there will be one near you. All are equipped with extensive stocks of material and workshops.

Expert on-site advice by experienced engineers, speedy and economical delivery and international customer service ensure that our customers get the most from our products.
